

CISC 2305

Programming Assignment 2 (20 Pts)

Due at 10:00 PM Central (MyCampus)

Topics: C# Programming Basics

Write a C# program that converts degree Fahrenheit to degree Celsius.

Your program should input integer Fahrenheit (F) temperature and convert it to its equivalent integer Celsius (C) temperature using the following formula:

$$C = 5(F - 32)/9$$

Your application, when executed, should look something like this:

Please Enter the Fahrenheit temperature: 32
The equivalent Celsius temperature is 0.
