

CISC 2305

Programming Assignment 3 (20 Pts)

Due at 10:00 PM Central (MyCampus)

Topics: C# Programming Basics

Write a C# program that converts an integer number of seconds to an equivalent number of hours, minutes and seconds. For instance, if the user input is 52400 seconds, your program should display this as 14 hours, 33 minutes, and 20 seconds.

Hint: $52400/3600 = 14$ (remainder 2000 secs)
 $2000/60 = 33$ (remainder 20 secs)
