

CISC 2305

Programming Assignment 6 (20 Pts)

Due at 10:00 PM Central (MyCampus)

Topics: C# Programming control statements and methods

In this program, you are to take your assignment 5 (below) and write it in a separate method/function. The only thing that you will do in the main method is call your new method. Call your method DisplayNumbers (or give it an appropriate name of your choice).

Write a C# program that displays all the negative numbers in a sequence of numbers inputted by the user. Before reading the sequence of numbers, have the user enter how many numbers will be inputted. For instance, the following (23, 67, -21, 94, -11, -3) consists of 5 numbers and the negative count should return 3.

Bonus (None):
