

CISC 2305

Programming Assignment 9 (20 Pts)

Due at 10:00 PM Central (MyCampus)

Topics: C# Programming control statements (repetition) and methods

Geometric Calculations:

In this programming assignment, you are to write a menu-driven program that calculates the area of a circle, circumference of a circle, or the volume of a cylinder. Your application should provide a menu like

1. Area
2. Circumference
3. Volume

and perform the appropriate calculation based on the user's choice. The user should repeat this exercise as much as desired without having to run the program each time
