

CISC 2330
Assignment 9 (20 Pts)

Due at 10:00 PM Central (MyCampus)

Topics: Control Structures (Selection & Repetition):

Using loops for various purposes

Write a program that does the followings:

Prompt the user to input 2 integers: FirstNum and SecondNum with the constraint that FirstNum must be less than SecondNum.

- Output all the odd numbers between FirstNum and SecondNum
- Output the sum of all even numbers between FirstNum and SecodnNum
- Output the numbers and their squares between 1 and 10
- Output the sum of the squares of the odd numbers between FirstNum and SecondNum
- Output all of the uppercase letters

Also for homework, complete exercises 23 & 30 (p 321-3)
