

*CISC 4391*  
*Assignment 5 (20 Pts)*

*Due at 10:00 PM Central (MyCampus)*

- I. Topics: Deciding What Happens:
  - 1. Complete the following programming problem (p118)
    - **4.5**

II. Topics: **OpenGL Input and Interaction:**

For this assignment, you are to rewrite your assignment 5 (recursive Sierpinski gasket) such that the left mouse button will start the generation of points on the screen, the right mouse button will halt further generation of new points, and the middle mouse button will terminate the program. Make sure you include a **reshape** call back.
